

# LIS566

## Electronic Resources of the Internet

subject to change: 2001-12-28

The latest version of this document is available on the web at <http://openlib.org/home/krichel/lis566n01a/>.

### **Course Description**

Today, most electronic resources are available on or via the Internet. In the past, a course on such resources would have covered the main ones in some detail. Such an approach seems to be inappropriate now that there are so many resources. Limiting the course to listing and learning to use resources seems to be not intellectually challenging enough for a graduate course.

The course will cover history of Internet resources, and cover some search engines and directories.

This course will not be providing students with an introduction to the Internet as such. This is covered in LIS565.

### **Course objectives**

On completing this course, students

- will have been introduced to using email lists
- will have been introduced to usenet news
- will be introduced to the web directories;

### **Prerequisites**

Students should have a basic command standard Internet applications such as a web browser and an email client.

### **Instructor**

Thomas Krichel

Palmer School of Library and Information Science

C.W. Post Campus of Long Island University

720 Northern Boulevard

Brookville, NY 11548-1300

[krichel@openlib.org](mailto:krichel@openlib.org)

work phone: +1-(516)299-2843

Private contact details may be obtained from the online CV at [/home/krichel/cv.html](http://home/krichel/cv.html).

### **Class structure**

Classes will be held on Sunday afternoon between 16:00 and 18:30 at the Manhattan site. There will be a mixture of lectures and hands-on work in the lab. Provisional class details are:

	2001-09-08	<i>no class</i>
	2001-09-15	<i>no class</i>
0	2001-09-23	Introductory class
1	2001-09-30	email lists I
2	2001-10-07	email list II
3	2001-10-14	usenet news
4	2001-10-21	the dmoz project
5	2001-10-28	comparative resource guides
6	2001-11-04	search engines: google
7	2001-11-11	comparative search engines
8	2001-11-18	software resources
	2001-11-25	<i>no class</i>
9	2001-12-02	file sharing
10	2001-12-09	digital libraries
12	2001-12-16	<i>no class</i>

### **Readings**

Not too surprisingly, most of the reading that we will do will be found on the Internet! The instructor will list main resources that he used to prepare the class. He will also distribute printed copies of his slides for students to scribble on.

### **Assessment**

Some classes will have a , except for the first class. This will either be a ten-minute mini exam, or a very short paper or file to be handed in. The unweighted average of these exams will make for 75% of the grade. The remaining 25% will be made be a 1500 word essay on a topic of the student's choice that has met the approval of the instructor. This essay has to be handed in before the last class. It is recommended to use the themes discussed in the beginning of the course as the topic for the essay.
